

# Rotary Afeka Avivtek Newsletter

January 2022

Rotary Afeka Avivtek is a unique Rotary club as all its members are executives in the Hi-Tech industry..

In this newsletter we are pleased to share with you info about 4 Israeli startups in various markets. You are welcome to [contact](#) us for any further inquiries about the below mentioned companies including details of their management.

## Early assessment and treatment of Autism

**BPAUS** is a web application for the early assessment and treatment of Autism. It helps healthcare providers and clinics to serve a full kit treatment to a wider audience, saving their money and time.

## Employee wellbeing experiences

**BeexOS** integrates all employee wellbeing experiences into a global, data-driven engagement platform. Leading tech enterprises like HP, Gett, Varonis, Walkme, Intel are already using our technology to drive 10X value from each of their investment in employee experiences.

## Help people who have lost the use of their upper limbs and hands

**6Degrees**, a startup that aims to help people who have lost the use of their upper limbs and hands to reclaim their digital life. Our motion-based controller translates the movements into computer commands on any operating system or smart device. One of the topics closest to my heart is assisting army veterans return to society and reintegrate into the workforce; our device helps them do so.

## Maximize human potential by reinventing learning

**Ann** provides AI-based tools that seamlessly integrate with both digital and physical textbooks and learning platforms of all kinds. Our technology enables educational publishers to personalize their content to their consumers, empowering them to increase student performance, collect meaningful consumer insight, and revolutionize the overall learning experience.
